

REN'PY

GAME MENU

Criamos um Game Menu sobre uma figura

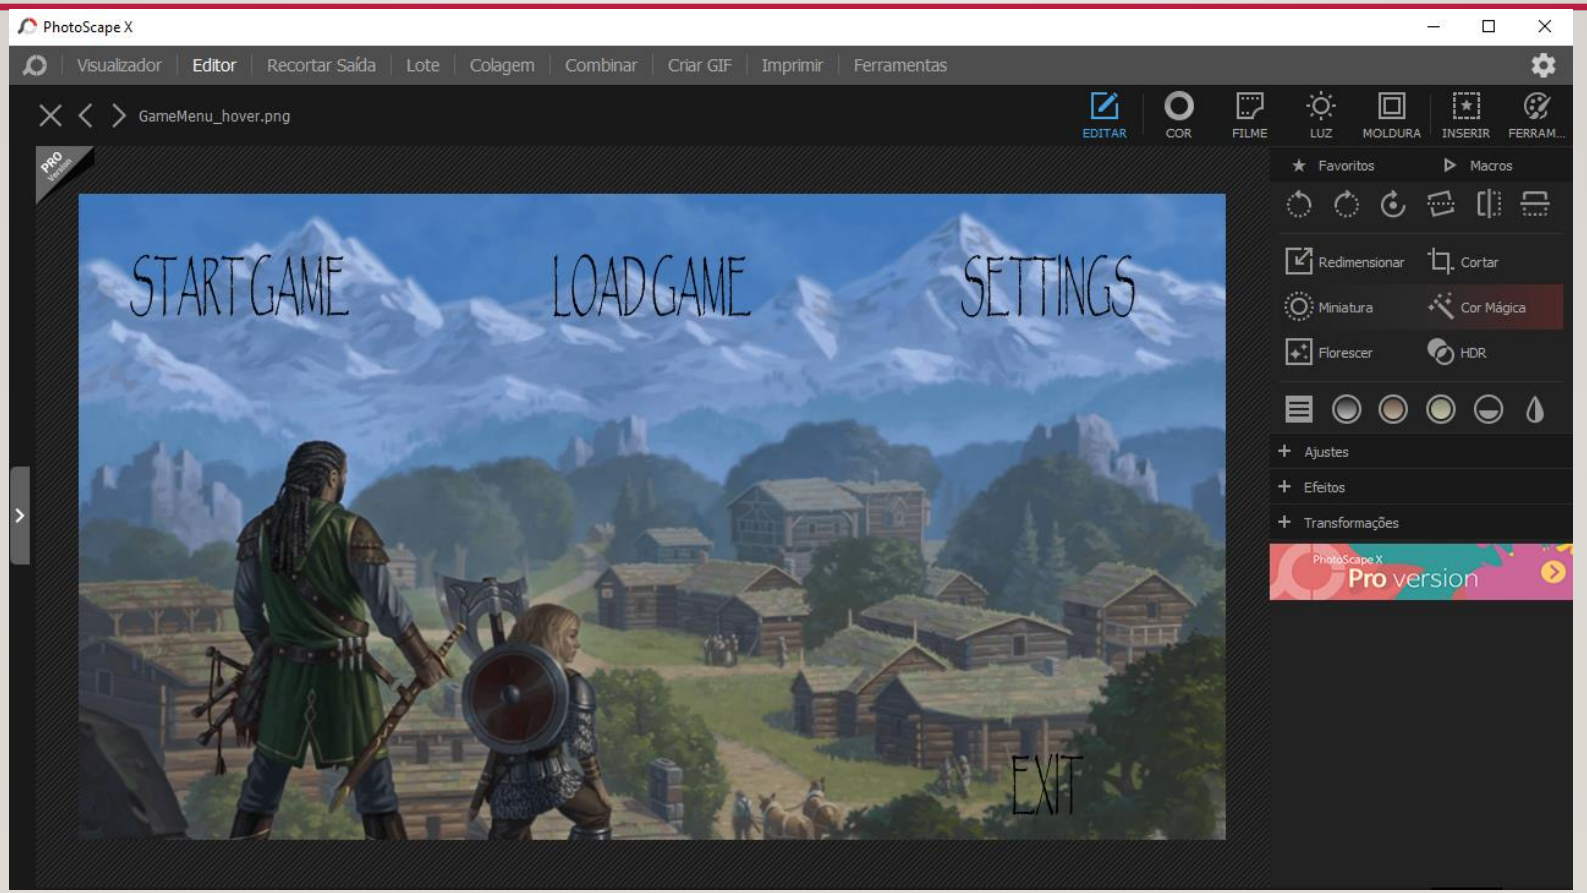

Salvamos, no diretório images, como GameMenu.png

Escrevemos as opções do Game Menu com outra cor

Salvamos, no diretório images, como GameMenu_hover.png

Acesse o arquivo screens e ache screen main_menu

Apague da linha seguinte (356) até o fim (410)

```
349 ## Main Menu screen ########################################
350 ##
351 ## Used to display the main menu when Ren'Py starts.
352 ##
353 ## https://www.renpy.org/doc/html/screen_special.html#main-menu
354
355 screen main_menu():
356
357     ## This ensures that any other menu screen is replaced.
358     tag menu
359
360     add gui.main_menu_background
```

```
349 ## Main Menu screen ########################################
350 ##
351 ## Used to display the main menu when Ren'Py starts.
352 ##
353 ## https://www.renpy.org/doc/html/screen_special.html#main-menu
354
355 screen main_menu():
356
357
358 ## Game Menu screen ########################################
359 ##
360 ## This lays out the basic common structure of a game menu screen. It's called
```

Agora altere o screen main_menu

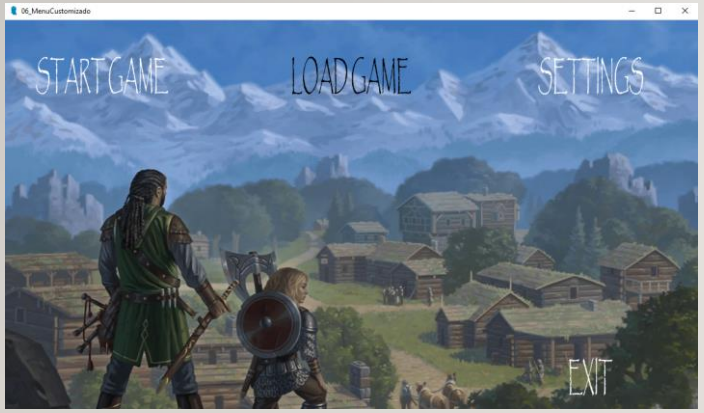

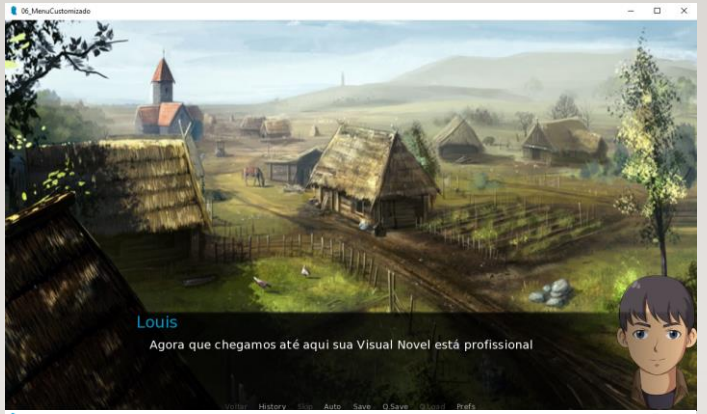

O programa principal está enxuto

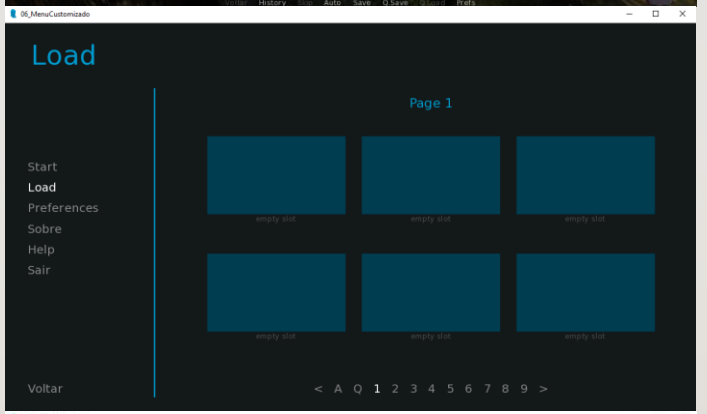

```
355 screen main_menu():
356     imagemap:
357         ground  "GameMenu.png"
358         hover "GameMenu_hover.png"
359 
360         hotspot (72, 82, 398, 148) action Start()  #Start Menu
361         hotspot (783, 85, 352, 135) action ShowMenu("load")  #Load Game
362         hotspot (1472, 82, 305, 143) action ShowMenu("preferences")  #Settings
363         hotspot (1547, 917, 142, 133) action Quit(confirm=False)  #Exit
```

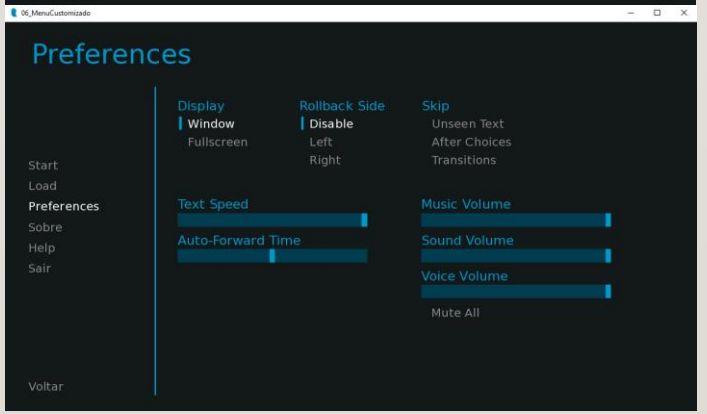

screens.rpy ✕ | script.rpy ✕

```
1  # Declare os apelidos e nomes dos personagens usados por este jogo
2  define L = Character("Louis")
3  
4  # declare as imagens usadas por este jogo
5  image Logo = im.Scale("forgottenrealms_logo.jpg", 1200, 330)  #original=400,110
6  image LouisRosto = "Louis_rosto.png"
7  image PhandalinVila = im.Scale("phandalin_vila.jpg", 1920, 1080)
8  
9  # O jogo começa aqui
10 label start:
11     scene black with dissolve
12     pause 1
13     show Logo at truecenter with zoomin # truecenter=meio da tela
14     $renpy.pause(2, hard="True")
15     scene PhandalinVila
16     show LouisRosto at right with moveinright
17     pause 1
18     L "Agora que chegamos até aqui sua Visual Novel está profissional"
19     pause 1
20     L "E ainda faltam mais aperfeiçoamentos"
21     pause 1
22 
23 return
```

Agora, ao executar o Projeto já temos um Game Menu
